# Ivan Zaki Efendi

## AI Automation Developer

AI Workflows | Document Intelligence | Business Automation

### PROFESSIONAL SUMMARY

AI Automation Developer with a background in automotive engineering at PT. Astra International Tbk (2019-2024). Specializing in AI-powered workflows, document intelligence, and business automation systems that reduce manual work and improve operational efficiency. Transitioned into AI and automation in 2023, driven by hands-on experience in large-scale manufacturing operations and running an independent e-commerce business.

### WORK EXPERIENCE

#### AI Automation Developer

2023 - Present

##### Freelance / Independent Projects

- Design and build AI-powered workflow automation for business operations
- Develop document intelligence solutions using LLMs (OpenAI, Claude, Gemini)
- Create internal tools for HR automation, meeting transcription, and brief generation
- Integrate n8n, Make, Zapier with REST APIs and Webhooks to automate end-to-end flows

#### Automotive Pro-Technician

2019 - 2024

##### PT. Astra International Tbk

- 5 years in production operations at Indonesia's largest automotive group
- Hands-on experience in process improvement, quality standards, and structured problem-solving
- Worked within large-scale manufacturing with focus on operational efficiency and lean practices

### PROJECTS

#### Filedrop

Production | [filedrop.digital](#)

Temporary cloud storage service for freelancers and creative agencies. Enables secure, encrypted file delivery to clients with uploads up to 500 GB at affordable pricing.

#### AI Resume Screening

AI Internal Tool

Automates HR resume screening by processing dozens to hundreds of CVs quickly and accurately using LLM-powered analysis and scoring.

#### AI Meeting Note

AI Internal Tool

Transcribes meeting recordings into structured summaries: key points, action items, todo lists, and problem notes — ready to share with internal teams.

#### AI Creative Brief

AI Internal Tool

Generates project summaries, todo lists, goals, and key deliverables from exported WhatsApp client conversations for creative teams.
